

# Spark Irrigation System

*smart farms*

## Objectives of the Spark solution

From anywhere with safety, using your smartphone, tablet or PC, you can completely control the irrigation of your farm with adequate of the amount of water, fertilizer and energy, while with a follow-up of the staff tasks and resources.

## Advantages of the solution

- 1- Benefits:
  - Minimize human error
  - Irrigation at the right time,
  - Enormous saving of energy and water.
  - Huge saving of time
- 2- Use the right amount of irrigation water according to the type and age of the tree in each area
- 3- Save energy (electrical energy, gas, diesel, ...)
- 4- Minimize the number of workers or you can assign these number of workers to other tasks
- 5- Flexibility in irrigation scheduling (ex, irrigate at night )
- 6- The solution is modular and composed of 9 modules.
- 7- You can simply invest in the modules necessary for your farm and add more later.
- 8- The solution is suitable for small, medium and large farms.
- 9- The price is reasonable and affordable
